***Election/Restrictions***

Applicant's election without traverse of Species A, claims 1-5 and 14-18 in the reply filed on 2-23-2009 is acknowledged.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 2-4 the limitation "before evaporation" or "after evaporation" these limitations are vague since any liquid, such as water, has at any time, pressure and temperature a vapor pressure and hence is at a constant state of evaporation.

***Double Patenting***

Claims 1-5 and 14-18 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of copending Application No. 11/997,539. Although the conflicting claims are not identical, they are not patentably distinct from each other because the information detecting means of the instant application are not patently distinct from the notification section of the co-pending application.

Art Unit: 3742

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 5, 16, 17 and 18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Narcisi et al.(U.S.Pat.5,010,806).

***Allowable Subject Matter***

Claims 4 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kolvites is cited to show methods and structures similar to the claimed invention.
